SECTION III – RISK FACTORS

An investment in equity shares involves a high degree of risk. Prospective investors should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties described below, before making an investment in the Equity Shares. The risks and uncertainties described below are not the only ones relevant to us or our Equity Shares, the industry in which we operate or to India. Additional risks and uncertainties, not currently known to us or that we currently do not deem material may also adversely affect our business, results of operations, cash flows and financial condition. If any of the following risks, or other risks that are not currently known or are not currently deemed material, actually occur, our business, results of operations, cash flows and financial condition could be adversely affected, the price of our Equity Shares could decline, and investors may lose all or part of their investment. To the extent the COVID-19 pandemic adversely affects our business and financial results, it may also have the effect of heightening many of the other risks described in this section.

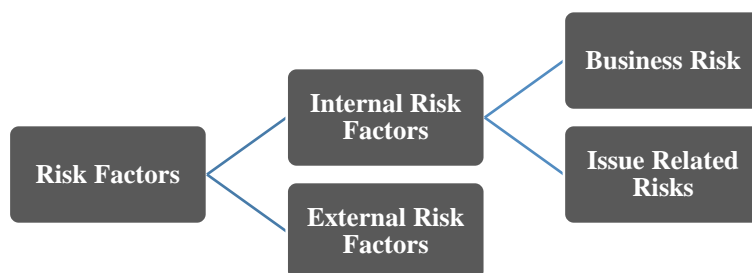

Unless otherwise stated in the relevant risk factors set forth below, we are not in a position to specify or quantify the financial or other implications of any of the risks mentioned herein. To obtain a complete understanding, you should read this section in conjunction with the chapters titled “Our Business” beginning on page 81, “Our Industry” beginning on page 73 and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 183 respectively, of this Draft Red Herring Prospectus as well as other financial information contained herein.

The following factors have been considered for determining the materiality of Risk Factors:

- *Some risks may not be material individually but may be found material collectively;*
- *Some risks may have material impact qualitatively instead of quantitatively;*
- *Some risks may not be material at present but may have material impact in future.*

The financial and other related implications of risks concerned, wherever quantifiable, have been disclosed in the risk factors mentioned below. However, there are risk factors where the impact may not be quantifiable and hence the same has not been disclosed in such risk factors. Unless otherwise stated, the financial information of the Company used in this section is derived from our financial statements under Indian GAAP, as restated in this Draft Red Herring Prospectus. Unless otherwise stated, we are not in a position to specify or quantify the financial or other risks mentioned herein. For capitalized terms used but not defined in this chapter, refer to the chapter titled “Definitions and Abbreviations” beginning on page 2 of this Draft Red Herring Prospectus. The numbering of the risk factors has been done to facilitate ease of reading and reference and does not in any manner indicate the importance of one risk factor over another.

The risk factors are classified as under for the sake of better clarity and increased understanding:

INTERNAL RISK FACTORS

Business Risks:

- 1) We materially rely on a single customer of our revenues from operations for the financial year 2021-22, 2020-21 and 2019-20. . Any loss of business from such customer may adversely affect our revenues and profitability.**

One of our customers contributes 78.21%, 88.24% and 74.51% of our revenues during the financial year 2021-22, 2020-21 and 2019-20 respectively. Any decline in our quality standards, growing competition and any change in the demand for our products by this customer may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from this customer, and loss of business from them may adversely affect our revenues and profitability. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

- 2) Our top 10 and top 5 customers contribute majority of our revenues from operations for the financial year 2021-22, 2020-21 and 2019-20. Any loss of business from one or more of them may adversely affect our revenues and profitability.**

Our top 10 customers contributed 94.78%, 96.10% and 96.13% of our revenues during the financial year 2021-22, 2020-21 and 2019-20 respectively, whereas, our top five customers contribute 91.53%, 93.86% and 92.07% of our revenues during the financial year 2021-22, 2020-21 and 2019-20 respectively. Any decline in our quality standards, growing competition and any change in the demand for our products by these customers may adversely affect our ability to retain them. We cannot assure that we shall generate the same quantum of business, or any business at all, from these customers, and loss of business from one or more of them may adversely affect our revenues and profitability. We intend to retain our customers by offering solutions to address specific needs in a proactive, cost effective and time efficient manner. This helps us in providing better value to each customer thereby increasing our engagement with our new and existing customer base that presents a substantial opportunity for growth.

- 3) Our top 10 and top 5 suppliers contribute majority of our purchase during the financial year 2021-22, 2020-21 and 2019-20. Any delay in or shortage from one or more of them may adversely affect our operations.**

Our top 10 suppliers contributed 85.59%, 91.68% and 86.77% of our purchase during the financial year 2021-22, 2020-21 and 2019-20 respectively, whereas, our top five suppliers contribute 68.56%, 80.64% and 71.96% of our purchase during the financial year 2021-22, 2020-21 and 2019-20 respectively. Any disruption of supply of raw materials from suppliers will adversely affect our operations and financial cost.

- 4) We may face product returns, refunds and recalls, as well as product liability and warranty claims and legal proceedings, if the quality of our products does not meet our customers' expectations or causes harm to customers in the future, which may adversely affect our business, reputation and results of operations**

Due to the nature of our business, we face a risk of our products containing quality issues or undetected errors or defects, especially when first introduced or when new models or versions are released. These may result from the design or manufacture of the product, or from the software or other components used in the product. We set internal quality standards and implement quality control processes across our business. However, we cannot assure you that we would be able to prevent or detect all quality issues in a timely manner or at all. Such quality issues may result in customers returning defective products to us for a cash refund or a replacement of their products during the warranty period of the products. Our standard warranty for the products is for one year.

As per our warranty policy, we have a provision of 0.25% of the total sales (except repeaters) on products. The standard warranty for repeaters is one year, but sometimes it may vary according to customer negotiation.

We cannot assure you that the rate and cost of us providing refunds or replacements will not increase in the future. Increase in the rate of product returns may lead to customer dissatisfaction, which may adversely affect our reputation, business and financial condition.

In addition, serious quality issues can expose us to product liability or recall claims in the event that our products fail to meet the required quality standards, or are alleged to cause harm to customers. We face the risk of legal proceedings and product liability claims being brought against us by various entities including consumers, government agencies etc. for various reasons including for defective products sold. Should any new developments arise, such as a change in Indian law or rulings against us by appellate courts, tribunals or other quasi-judicial authorities, we may need to make provisions in our financial statements, which could increase our expenses and our current liabilities. We cannot assure you that we will not experience any material product liability losses or product recalls in the future or that we will not incur significant costs to defend any such claims, which could have an adverse effect on our business, financial condition or results of operations. A product recall or a product liability claim may also adversely affect our reputation and brand image, as well as entail significant costs in excess of our available insurance coverage, which may adversely affect our reputation, business and results of operations.

5) We intend to utilize a portion of the Net Proceeds for “Expansion of Business Unit”

We intend to utilize part of the Net Proceeds for Part Expansion of Project. Our Company is in the process of expansion of Business Operations by setting up a new plant at Noida. For the said object the Company will incur an amount of Rs. 3914.31 lakhs (approximate) towards setting up the plant and other ancillary expenses which will be met through Issue of Shares and Internal accruals. In future, our inability, if any to meet our working capital requirements through banking arrangements or internal accruals can adversely impact our business operations and financial position.

8) Any change in the technology may render our current technologies obsolete or require us to make substantial capital investment to cope with the market.

Technology upgradation is a regular process and it is also essential for providing the desired quality to the customers. We are taking all the possible steps to keep our manufacturing facilities in line with the latest technology. However, any further upgradation in the technology may render our current technology obsolete and require us to upgrade the existing technology or implement new technology. Further implementing new technology may require us to incur huge capital expenditure which could affect our cash flows and result of operations.

9) We are subject to stringent labour laws or other industry standards and any strike, work stoppage, Lock-out or increased wage demand by our employees or any other kind of disputes with our employees could adversely affect our business, financial condition and results of operations.

Our manufacturing activities are labor-intensive. We are subject to a number of stringent labour laws that protect the interests of our workers, including legislation that stipulates rigorous procedures for dispute resolution and retrenchment of workers and imposes financial obligations on employers. While we have not experienced significant labour unrest in the past, strikes, lock-outs and other labour action but such may have an adverse impact on our operations, and if not resolved in a timely manner, could lead to disruptions in our operations. We cannot guarantee that we will not experience any strike, work stoppage, lock out or increased wage or other industrial action in the future and any such event could adversely affect our business, results of operation and financial condition.

- 11) We sell our products under our brand name “Frog Cellsat”. If we are unable to maintain quality, our brand building exercise may be adversely affected. Any deterioration in the reputation and market perception of our brand may have an adverse effect on our sales, profitability and the implementation of our growth strategy.**

We believe that the recognition and reputation of our brand “Frog Cellsat” among customer has contributed significantly to the growth and success of our business. The ability to differentiate our brand and our products from our competitors through our branding is an important factor in attracting customers. If we fail to maintain our reputation, enhance our brand recognition or increase positive awareness of our products, it may be difficult to maintain and grow our customer base, which could have a material adverse effect on our business and prospects.

- 12) We are dependent on third party vendors for delivery of materials required to us from our suppliers and delivery of our products to our clients. Any failure on part of such vendors to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.**

Our Company uses third party transportation providers for delivery of our goods. Any transportation strikes may have an adverse effect on our business. In addition, goods may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. There may also be delay in delivery of products which may also affect our business and results of operation negatively. An increase in the freight costs or unavailability of freight for transportation of our raw materials may have an adverse effect on our business and results of operations. Further, disruptions of transportation services due to weather-related problems, strikes, lock-outs, inadequacies in the road infrastructure, or other events could impair ability to procure raw materials on time. Any such disruptions could materially and adversely affect our business, financial condition and results of operations.

- 13) If the market for our products develops more slowly than we expect, it may hamper our ability to grow as anticipated, and our business, financial condition, and results of operations could be adversely affected.**

Our future success will depend in large part on the growth and expansion of the market that we are established in, which is difficult to predict and relies on a number of factors, including client adoption, client demand, changing client needs, the entry of competitive products, the success of existing competitive products. The estimates and assumptions that are used to calculate our market opportunity are subject to change over time, and there is no guarantee that the organizations covered by our market opportunity estimates will pay for our products & services at all or generate any particular level of revenue for us.

A substantial portion of our Industry are concentrated in a few specific industry growth factors. A downturn in any of our targeted industry growth factors, a slowdown or reversal of the trend due to any kind of declining in the industrial growth services in any of the factors of manufacturing industries or the introduction of regulations that restrict or discourage companies from growing in their own sector then there could be a result in decrease in the demand for our product & services and adversely affect our business, financial condition and results of operations.

There can be no assurance that the relevant authorities will issue any of such permits or approvals in time or at all. Further, these permits, licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory

Our Promoters, Directors have provided personal guarantees to certain loan facilities availed by us. In the event that any of these guarantees are revoked or withdrawn, the lenders for such facility may require alternative guarantees, repayment of amounts outstanding under such facilities, or may even terminate such facility. We may not be successful in procuring alternative guarantees satisfactory to the lender, and as result may need to repay the outstanding amounts under such facility or seek additional sources of capital, which may not be available on acceptable terms or at all and any such failure to raise additional capital could affect our operations and our financial conditions

However, the insurance cover taken by us may not be adequate enough for covering the entire future unforeseen liabilities that might occur in the normal course of business. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honored fully, in part or on time by the insurers. To the extent that we suffer loss or damage that is not covered by insurance or which exceeds our insurance coverage, our business operations and cash flows may be affected. For details on Insurance cover, please see “Insurance” the chapter titled “Our Business” beginning on page 81 of this Draft Red Herring Prospectus

21) Our indebtedness and the restrictions imposed by our financing arrangements could adversely affect our ability to conduct our business and operations.

As on financial year ended 2022, we had total outstanding borrowings of Rs. 617.89 Lakhs. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Our financing arrangements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. In the event that we breach a restrictive covenant, our lenders could deem us to be in default and seek early repayment of loans. An event of default would also affect our ability to raise new funds or renew maturing borrowings as needed to conduct our operations and pursue our growth initiatives. Although we have received consents from our lenders for the Fresh Offer, these restrictive covenants may affect some of the rights of our Shareholders.

22) Our Promoters and Promoter group will continue to retain significant control over our Company after the Public Offer.

Upon completion of the Public Offer, our Promoters and Promoter Group will continue to own majority of our Equity Shares. - 23) The Registered Office and Noida Manufacturing unit of the Company is not owned by us. In the event, we are unable to renew the rent agreement, or if such agreement is terminated, we may suffer a disruption in our operations.**

Though the Companies Act, 2013 has brought into effect significant changes to the Indian company law framework including specific compliance requirements such as obtaining prior approval from the audit committee, board of directors and shareholders for certain related party transactions, we cannot assure you that such transactions, individually or in the aggregate, will not have an adverse effect on business and financial results, including because of potential conflicts of interest or otherwise.

- 26) We face competition in our business from both domestic and international competitors. Such competition would have an adverse impact on our business and financial performance**

The industry, in which we are operating, is highly and increasingly competitive and our results of operations and financial condition are sensitive to, and may be materially adversely affected by, competitive pricing and other factors. Competition may result in pricing pressures, reduced profit margins or lost market share or a failure to grow our market share, any of which could substantially harm our business and results of operations. There can be no assurance that we can effectively compete with our competitors in the future, and any such failure to compete effectively may have a material adverse effect on our business, financial condition and results of operations.

The deployment of these funds raised through this Offer, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Offer proceeds could adversely affect our finances.

28) Our success depends largely upon the services of our Promoters and other Key Managerial Personnel and our ability to retain them. Our inability to attract and retain them may adversely affect the operations of our Company.

Our Company and our Promoters have built relations with suppliers, clients and other persons who are connected with our business. Further, our Key Managerial Personal also possesses the requisite domain knowledge to provide efficient services to our clients. Accordingly, our Company's performance is dependent upon the services of our Promoters and other Key Managerial Personnel. Our future performance will, therefore, depend upon the continued services of these persons. It is possible that we may lose our skilled and trained staff to our competitors and high attrition rates in particular, could result in a loss of domain and process knowledge. Demand for key managerial personnel in the industry is intense and our inability to attract and retain Key Managerial Personnel may affect the operations of our Company.

29) We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and serious harm to our reputation. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected.

30) Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

31) Our revenues and expenses are difficult to predict and can vary significantly from period to period, which could cause our share price to decline.

The economic environment, pricing pressure and decreased employee utilization rates could negatively impact our revenues and operating results. In the event that the Government of India or the government of another country changes its tax policies in a manner that is adverse to us, our tax expense may materially increase, reducing our profitability.

32) We have not independently verified certain industry data in this Draft Red Herring Prospectus.

We have not independently verified data from the industry and related data contained in this Draft Red Herring Prospectus and although we believe the sources mentioned in the report to be reliable, we cannot assure you that they are complete or reliable. Such data may also be produced on a different basis from

comparable information compiled with regards to other countries. Therefore, discussions of matters relating to India, its economy or the industries in which we operate that is included herein are subject to the caveat that the statistical and other data upon which such discussions are based have not been verified by us and may be incomplete, inaccurate or unreliable. Further, we cannot assure you that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

Offer Related Risks:

33) Any future issue of Equity Shares may dilute your shareholding and sales of our Equity Shares by our Promoters or other major shareholders may adversely affect the trading price of the Equity Shares.

Any future equity issues by us, including in a primary offering, may lead to the dilution of investors' shareholdings in us. Any future equity issuances by us or sales of its Equity Shares by the Promoters may adversely affect the trading price of the Equity Shares. In addition, any perception by investors that such issuances or sales might occur could also affect the trading price of our Equity Shares.

34) Our ability to pay any dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures

The amount of our future dividend payments, if any, will depend upon our Company's future earnings, financial condition, cash flows, working capital requirements, capital expenditures, applicable Indian legal restrictions and other factors. There can be no assurance that our Company will be able to pay dividends.

35) There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Following the Offer, we will be subject to a daily "Circuit Breaker" imposed by NSE, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based, market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our circuit breakers will be set by the stock exchange based on the historical volatility in the price and trading volume of the Equity Shares.

EXTERNAL RISK FACTORS

36) *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when

any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

37) *A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.*

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and

global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

38) *Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.*

Our business and financial performance could be adversely affected by unfavorable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to “Key Industry Regulations and Policies” on page 100 of this Draft Red Herring Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavorable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

39) *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general

price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

40) *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

41) *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

42) *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards ("IFRS"). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the "IFRS Convergence Note"). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders' equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

43) *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as "systemic risk," may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about

Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

44) *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

45) *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company's business could cause its results of operations to suffer. Any significant change in India's economic policies could disrupt business and economic conditions in India generally and the Company's business in particular.

46) *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

OVERVIEW:

The Telecom industry in India is the second largest in the world with a subscriber base of 1.17 bn as of April 2022 (wireless + wireline subscribers). India has an overall tele-density of 84.88 %, of which, the tele-density of the rural market, which is largely untapped, stands at 58.16% while the tele-density of the urban market is 134.70%. India surpassed the US to become the second largest market in terms of number of app downloads.

By the end of December 2021, the total number of internet subscribers increased to 829.3 mn (narrowband + broadband subscribers), out of which 37.25% of the internet subscribers belong to the rural areas. The number of broadband subscribers has increased to 788.77 mn as of April, 2022.

The industry’s exponential growth over the last few years is primarily driven by affordable tariffs, wider availability, roll-out of Mobile Number Portability (MNP), expanding 3G and 4G coverage, evolving consumption patterns of subscribers, Government’s initiatives towards bolstering India’s domestic telecom manufacturing capacity, and a conducive regulatory environment.

To further expedite digital connectivity, the Government has approved the auction of IMT/5G spectrum for deployment of 5G services within the country.

The Telecom sector is the 3rd largest sector in terms of FDI inflows, contributing 7% of total FDI inflow, and contributes directly to 2.2 mn employment and indirectly to 1.8 mn jobs. Between 2014 and 2021, the FDI inflows in the Telecom sector rose by 150% to \$20.72 bn from \$8.32 bn during 2002-2014. 100% Foreign Direct Investment (FDI) has now been allowed in the Telecom sector under the automatic route.

The liberal and reformist policies of the Government of India have been instrumental along with strong consumer demand in the rapid growth in the Indian telecom sector. The Government has enabled easy market access to telecom equipment and a fair and proactive regulatory framework that has ensured availability of telecom services to consumer at affordable prices. The deregulation of Foreign Direct Investment (FDI) norms have made the sector one of the fastest growing and the top five employment opportunity generator in the country.

Wireless subscriptions (in million)

Indian Telecom Market:

India is currently the second-largest telecommunication market and has the second-highest number of internet users in the world. The PLI scheme in telecom and networking products aims to make India a global hub of manufacturing telecom equipment. It is estimated that full utilisation of the scheme funds is likely to lead to incremental production of about Rs. 2.4 lakh crore (US\$ 32.01 billion) with exports of ~Rs. 2 lakh crore (US\$ 26.67 billion) over five years. India’s telephone subscriber base increased to 1178.41 million in

December 2021, from 1,173.83 million in December 2020. In India, tele-density (defined as the number of telephone connections per 100 individuals) stood at 85.91%, as of December 2021.

Increase in wireless segment and rural subscribers:

Internet subscription (in million)

The share of the wireless segment in India’s telecommunications market has increased steadily. The wireless segment accounted for 98.0% of the total telephone subscriptions In December 2021. Wireless subscription has grown robustly over the past few years. The growth in wireless subscriptions has led to a significant rise in wireless tele-density. In FY21, wireless subscriptions stood at 1,180.96 million, and wireless tele-density reached 86.68%. As of December 2021, the wireless subscriber base of Jio stood at 415.72, followed by Bharti Airtel (205.87 million) and Vodafone Idea (122.14 million).

Internet consumers increasing at fast pace:

In July-September 2021 India’s Internet subscribers is 834.29 million of which 24.47 million were wired subscribers and 809.82 million were wireless internet subscribers. The number of internet subscribers in the country increased at a 13.38% CAGR from 391.5 million in 2016 to 834.3 million in 2021. The number of internet subscribers in the country is expected to reach 900 million by 2025. India is likely to have 330 million 5G subscribers by 2026. India is expected to have ~37-40 million smartphone users (handsets supporting 5G technology) by end-2021 Overall IP traffic is

Telecom Subscriber in Million

expected to grow four-fold at a CAGR of 30% by 2021. Average wireless data usage per wireless data subscriber was 14.6 GB per month in FY21 and is expected to reach to 40 GB by 2026.

Telecom Revenue:

The Indian telecom sector’s gross revenue declined from US\$ 40.29 billion in FY16 to US\$ 37.36 billion in FY21. Gross revenue of the telecom sector stood at Rs. 64,801 crore (US\$ 8.74 billion) in the first quarter of FY22. Indian telecom sector’s revenue grew at 4.16% in FY21 from FY20 on the back of stabilising tariff wars and increased spending by subscribers due to minimum recharge plans. In August 2021, the Department of Telecommunications (DoT) officials stated that it is working on a package, which includes reducing the revenue share licence fee to 6% of adjusted gross revenue (AGR) of the operators from the current 8%. This would be done by reducing the 5% universal service obligation levy by two percentage points and providing relief of about Rs. 3,000 crore (US\$ 403.63 million) annually to the operators.

Emergence of Telecom Tower Industry:

The telecom tower market is expected to grow at a compound annual growth rate of 6.04% over the forecast period to reach a market size of US\$105.262 billion in 2026 from US\$71.259 billion in 2019. Telecom tower market refers to the infrastructure provided by the telecom players under the private ownership, shared infrastructure service, or as a joint venture to provide the services of connection or data to a wide audience.

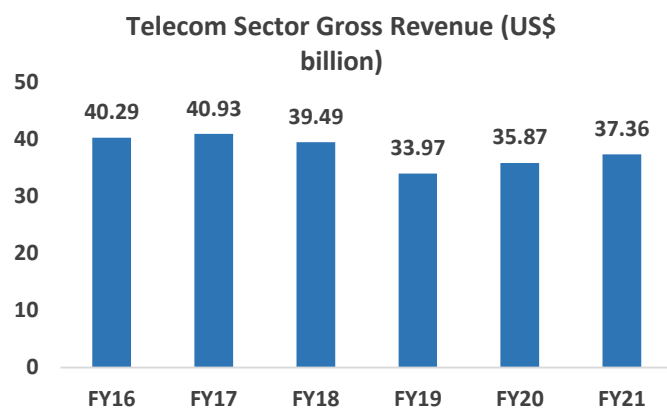

The telecom tower infrastructure carriers operated on the model of finding the property to install the tower at a reasonable price, having permits arranged, and constructing the facility on the behalf of the telecom companies in return for a rent. This modus operandi has remained for a substantial period under the telecom tower space with the intent of increasing the customer base. The sector has witnessed growth in terms of service streams to mobile connections, broadband, internet, and others. However, despite such advancements at the global level, As per IFC reports, there are 3 billion people across the globe remaining unconnected to telecommunications. This calls for the last mile connectivity programs from telecommunications service and tower infrastructure providers.

With the change in the market dynamics, the telecom tower companies are now motivated to undertake the route of digital transformation with advancement in technology to 5G, growing competition, altering the tower specifications, and increasing rural markets' customer base. Such changes have changed the towers to fiber telecommunications towers, active towers, and data consoles. Upgraded the applications from simple telephone services, broadband to the running of e-commerce businesses and many more. However, there remain concerns over gaining permits and access to the construction of towers and the lack of skilled labor to undertake the construction work.

Global Base Station Antenna Market

The global base station antenna market size was valued at USD 7.24 billion in 2021 is projected to reach USD 18.37 billion by 2027, exhibiting a CAGR of 16.2% during the forecast period. Gradual rollout of 5G infrastructures around the world will be the most crucial growth determinant for this market, observes Fortune Business Insight in its report, titled “Base Station Antenna Market Size, Share & COVID-19 Impact

Analysis, By Type (Omni Antenna, Sector Antenna, Dipole Antenna, Multibeam Antenna, Small Cell, and Others), By Technology (3G, 4G/LTE, and 5G), By Application (Mobile Communication, Intelligent Transport, Industrial IoT, Smart City, Military and Defense and Others), and Regional Forecast, 2020-2027”.

According to the industry body Global System for Mobile Communications (GSMA), 5G networks will cover approximately one-third of the global population by 2025. This is punctuated by the fact that some of the world’s largest economies are already deploying 5G infrastructures. For example, in 2019 in China, China Telecom, China Unicom, and China Mobile launched the world’s largest 5G network, with services activated within five months of the rollout. Similarly, in Germany, Deutsche Telecom Germany and Vodafone Germany deployed 5G services across several cities in 2019. These network services are delivered through base station (BST) antennas installed in cell towers that facilitate data transmission. Since 5G networks are data-heavy, the demand for BST antennas is likely to surge with increasing deployment of 5G infrastructures in the world’s major economic hubs.

Global Base Station Antenna Market in USD Billion

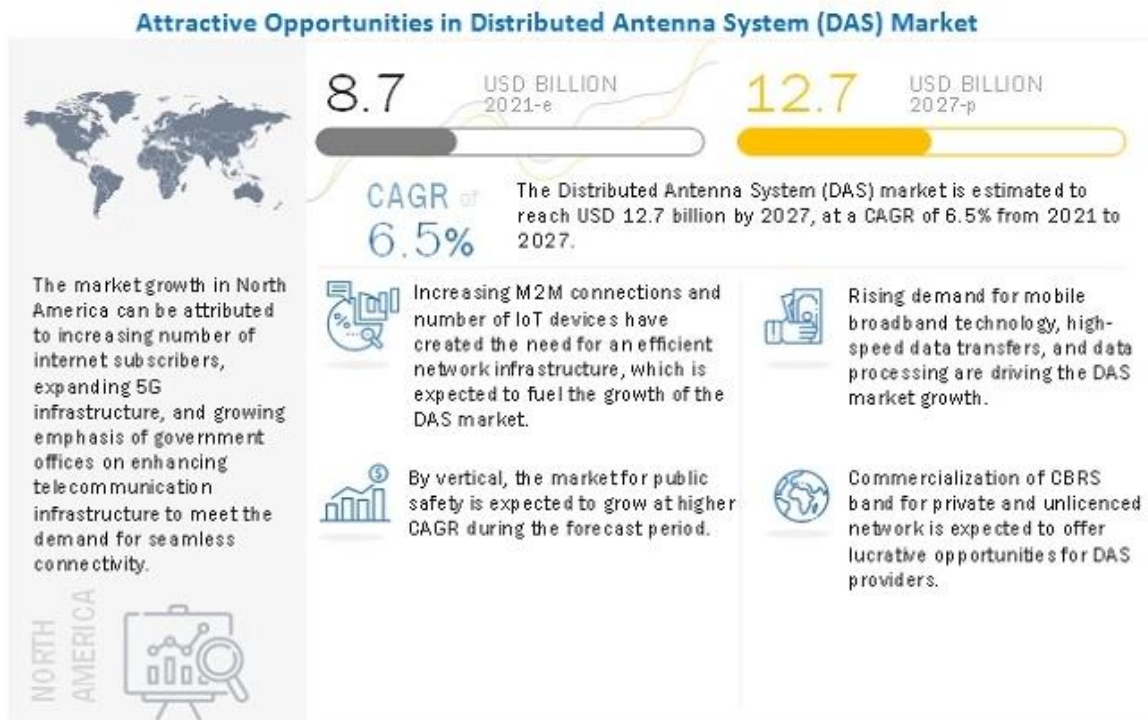

Global Distributed Antenna System

The DAS market is projected to grow from USD 8.7 billion in 2021 to USD 12.7 billion by 2027; it is expected to grow at a CAGR of 6.5% during the forecast period. The market for services is expected to be worth USD 8.7 billion by 2027, while the market for components is expected to be worth USD 4.0 billion by 2027, growing at CAGRs of 6.5% and 7.0%, respectively. Some of the major factors that are driving the growth of the distributed antenna system (DAS) market include increasing mobile data traffic, growing number of connected devices due to Internet of Things (IoT), rising demand for extended network coverage and uninterrupted connectivity, and increasing construction of buildings based on modern and sustainable concepts.

Driver: Growing mobile data traffic

The rise in the number of subscribers of cellular networks has propelled the need for increasing macrocell deployments. It is becoming difficult for mobile service providers to offer seamless coverage via existing macrocell base stations. According to the Cisco Visual Networking Index, global mobile devices and

connections are projected to increase to 13.1 billion in 2023 from 8.8 billion in 2018. As the number of mobile devices with advanced computing and multimedia capabilities is increasing, the demand for more capable and intelligent networks is simultaneously growing. Connectivity technologies have evolved from 2G to 3G, 3.5G, and 4G, and the evolution trend is likely to continue in the coming years, which would lead to the commercialization of 4.5G (LTE/LTE-A/LTE-AP) and 5G. With the evolution of mobile connectivity technologies, the need for bandwidth management is also rising. Dependence on macrocellular networks alone would not facilitate service providers to meet the customers' demands.

Production Process:

Manufacturing Process

- Initially the purchase order from Customer is received. Production planning is done against all the purchase order received and the requirement/shortages of raw material calculated and forwarded to the sourcing department.
- The raw materials required for manufacturing the products are purchased from Vendors by issuing the purchase order to the vendors.
- Vendor sends the raw materials as per purchase order received at our Store, after the Material is received at Store, our personnel's inspect the received material, if material is of ordered quality then the material is stored as a Stock in our Store, if material is rejected, then it is returned back to Supplier/Vendor for rework/replacement.
- We receive the product requirement plans and quality specifications from the customer, draw up a proposal for the manufacturing the product and overall schedule, we also consider the feasibility of manufacturing the proposed product on a commercial scale.
- After establishing the feasibility of the project, we determine the specifications of the product in more detail by working on the design.
- We create & issue the Production work order in ERP as per production plan, after that Store issues the RAW materials as per Work Order BOM to production floor and we manufacture the required product as per quality specification of the Customer.
- After the product is finished from the production process, we sent it to QC (Testing/Visual Inspection) of the same product.
- During QC Testing of the manufactured product, the completed goods are closely inspected manually and by machine to make sure there are no defects or flaws. Only those goods that pass the inspection are moved for the packing department, where finished product is carefully packed as per defined work instructions and finished product is dispatched to the Store.

Telecom Regulatory Authority of India Act, 1997 (“TRAI”)

The Telecom Regulatory Authority of India (“**the Authority**”), is an independent regulatory authority for the telecommunications sector, which was established by an Act of Parliament, in 1997. The establishment of TRAI came as a consequence to the Government policies allowing private investments in telecom sector, especially in the light of a need of an impartial and independent sectoral regulator, at an arm’s length from the Government. With the amendments made in 2000 to the TRAI Act, the Authority’s erstwhile adjudicatory functions were moved to the Telecom Disputes Settlement and Appellate Tribunal (TDSAT). The TRAI Act was amended to state that, both, TRAI and TDSAT will regulate telecommunication services, adjudicate disputes, dispose of

appeals, and protect the interests of service providers and consumers of the telecom sector, with the aim of promoting and ensuring its orderly growth. The Authority has the power to make recommendations, on issues concerning licenses, competition and technological improvements, development of telecommunication technology, equipment usage by service providers and efficient spectrum management.

The Information Technology Act, 2000 (“Information Technology Act”)

The Information Technology Act has been enacted to provide legal recognition for transactions carried out by means of electronic data interchange and other means of electronic communication, commonly referred to as "Electronic Commerce", which involve the use of alternatives to paper-based methods of communication and storage of information etc. Additionally, the said Act also provides for civil and criminal liabilities including fines and imprisonment for various computer related offences. These include offences relating to unauthorized access to computer systems, it also recognizes contracts concluded through electronic means, creates liability for failure to protect sensitive personal data and gives protection to intermediaries in respect of third party information liability. It also provides civil and criminal liabilities. The Information Technology Act also provides punishment for offences committed outside India.

The Department of Information and technology, under the Ministry of Communications & information Technology, Government of India, has notified the Information Technology (Reasonable Security Practices and Procedures and Sensitive personal Data or Information) Rules 2011, which gives directions for the collection, disclosure, transfer and protection of sensitive personal data by a body corporate or any person acting on behalf of a body corporate. The said rules also require the body corporate to provide a privacy policy for handling and dealing on personal information, including sensitive personal data.

The Telecom Commercial Communications Customer Preference Regulations, 2018 (“TCCCPR”)

The TCCCPR has been enacted with an objective to curb menace of unsolicited commercial communications to subscribers and to regulate Telemarketers. TCCCPR was notified by the Telecom Regulatory Authority of India on July 19, 2018, which came into effect in a phased manner over a period of 150 days from the aforesaid date of notification and replaced the Telecom Commercial Communications Customer Preference Regulations, 2010. TCCCPR covers both calls as well as SMSs. Under these regulations a customer can register themselves in order to completely block unsolicited commercial communications or in the alternative can opt to receive promotions for specific categories. Those customers already registered on the Do Not Call Registry will be transferred to the fully Blocked list of the National Customer Preference Register. An aggrieved customer can lodge a complaint with his service provider, who is required to take appropriate action and inform the customer of the action taken within seven days of such complaint. TCCCPR provide for a wide range of customer preferences which are implemented in near time using distributing ledger technology to make communications traceable and capable of being controlled effectively, use of cloud-based solutions for handling complaints, the registration of headers and preferences, and use of smart contracts for automated allocation of roles between entities in the commercial communication ecosystem. These regulations also provide for a framework for registering telemarketers as well as setting out limits for registered and unregistered telemarketers along with levy of requisite fines and penalties on defaulting telemarketers.

National Telecom Policy 2012 (“NTP 2012”)

The Department of Telecommunications, Ministry of Communications and Information Technology, GoI, has formulated the NTP 2012, for creating an enabling framework for development of the telecom industry. In this

regard, NTP 2012 was created with a view to provide secure, reliable, affordable and high quality converged telecommunication services anytime, anywhere for an accelerated inclusive socio-economic development. The primary objective of NTP 2012 is maximizing public good by making available affordable, reliable and secure telecommunication and broadband services across the entire country. The main thrust of the Policy is on the multiplier effect and transformational impact of such services on the overall economy. It recognizes the role of such services in furthering the national development agenda while enhancing equity and inclusiveness. Availability of affordable and effective communications for the citizens is at the core of the vision and goal of the NTP 2012. NTP 2012 also recognizes the predominant role of the private sector in this field and the consequent policy imperative of ensuring continued viability of service providers in a competitive environment. Pursuant to NTP 2012, these principles would guide decisions needed to strike a balance between the interests of users/ consumers, service providers and government revenue.

B. Intellectual property laws

Intellectual Property Rights

Intellectual property rights in India enjoy protection under both statutory and under common law. The key legislations governing intellectual property in India are the Copyright Act, 1957, and the Trade Marks Act, 1999. The registration of a trademark is valid for a period of 10 years and can be renewed in accordance with the specified procedure.

Application for trademark registry has to be made to Controller-General of patents, designs and TM Act who is the Registrar of Trademarks for the purposes of the TM Act. The TM Act prohibits any registration of deceptively similar trademarks or chemical compound among others. Following the issuance of the International Copyright Order, 1999, subject to certain exceptions, the provisions of the Copyright Act applies to nationals of all member states of the World Trade Organization.

While copyright registration is not a prerequisite for acquiring or enforcing a copyright, registration creates a presumption favoring ownership of the copyright by the registered owner. Copyright registration may expedite infringement proceedings and reduce delay caused due to evidentiary considerations. Once registered, the copyright protection of a work lasts for 60 years. The remedies available in the event of infringement of a copyright under the Copyright Act include civil proceedings for damages, account of profits, injunction and the delivery of the infringing copies to the copyright owner.

The law of contract is essential to carry on trade or commerce smoothly, because it introduces definiteness in the business transactions. It does not mean that it affects only the business people. 13.1 The Group had made payments to Unitech golf and Country Club aggregating to Rs. 221.35lacs till date, as per the construction linked payment plan of 'Agreement for Sale' dated October 05, 2011 for purchase of an apartment. The borrowing cost capitalized up to March 31, 2016 amounts to Rs. 28.35 lacs. The Group has not made any additional payment as the construction has not progressed as per the construction linked plan and it has crossed its expected delivery date of March 31, 2014. Further, the Group has commenced legal proceeding against the real estate company on August 12, 2016 before the Hon'ble High Court of Delhi, for recovery of the amounts paid along with interest @ 10% in terms of the said agreement. Although the matter is scheduled for hearing and the decision by the court is pending, the management is still confident that it will be able to realize the capital advance through favourable outcome of the legal proceedings. However, the Group has made provision of Rs. 152.94lacs (previous year-Rs. 115.49lacs) against the aforesaid amounts.

Phased implementation of Unified Payments Interface

SEBI has issued the UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by RIBs through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till

June 30, 2019. Under this phase, an RIB had the option to submit the ASBA Form with any of the Designated Intermediary and use his/ her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public issues, whichever is later. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 has decided to extend the timeline for implementation of UPI Phase II until March 31, 2020. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds has been discontinued and replaced by the UPI Mechanism. However, the time duration from public issue closure to listing continues to be six Working Days during this phase. Subsequently, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020 extended the timeline for implementation of UPI Phase II till further notice.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing would be reduced to three Working Days. Accordingly, upon commencement of Phase III, the reduced time duration shall be applicable for the Offer.

Pursuant to the UPI Circular, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalised. Failure to unblock the accounts within the timeline would result in the SCSBs being penalised under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints in this regard, the relevant SCSB as well as the post – Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering the facility of making applications in public issues shall also provide the facility to make application using UPI. The Company will be required to appoint one of the SCSBs as a Sponsor Bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and/ or payment instructions of the Retail Individual Bidders using the UPI.

The processing fees for applications made by Retail Individual Bidders using the UPI Mechanism may be released to the remitter banks (SCSBs) only after such banks provide a written confirmation on compliance with SEBI Circular No: SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 read with SEBI Circular No: SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021.
